WHO WE ARE

TEANKA is a Greek manufacturing company, founded and established in '70, with a rich and strong presentation in the European and World manufacturing market. The company continues its successful activity in the field of manufacturing machinery for the plastics industry.

The company employs and collaborates with well-trained engineers and staff and is able to meet all the needs of the customers. Among our company's primary and integral goals, since its establishment until today, is the quality of the products and the development of innovative & high-tech production lines.

Today, the company's staff successfully completes the construction and administrative work of the company and manages the wide sales network in Greece and abroad, with a wide clientele in majority of countries in Europe, USA, Latin America, Africa and Asia.

WHAT WE SERVE

Customer & After Sales Service

Customer service is important to us. For this reason, our service team provides support in daily basis.

Eco-Friendly Design & Policy

Sustainability and protection of the environment are priorities at TEANKA. Our approach to protecting the environment is to set long-term goals to address the environmentally significant impacts from our products and business operations. Our most material environmental issues are water saving (rainwater collection, treatment and recycling), solar energy (collecting solar energy and use it in our facilities) and managing product end-of-life and implementing circular economy principles to conserve the Earth's resources.

TEANKA has developed an eco-friendly designing system. Our machines are specially designed in order to use high percentages of recycled raw materials.

Maintenance

With preventive and regular maintenance and control carried out by qualified and experienced specialists, the value and performance of TEANKA's machinery is preserved in the long run.

WHY CHOOSE US

We evaluate our suppliers and choose our raw materials very carefully, so we can always supply our customers high quality machinery, according to their expectations. TEANKA production lines and machinery are made for long term of use and are always easy to service, with short and easy maintenance.
