

# Complete Production Lines

**TEANKA**  
PLASTICS MACHINERY

## Pipe Production Lines

We manufacture complete production lines for plastic pipes, with diameters up to  $\varnothing$  160mm and production speeds up to 350 m/min.

### Applications:

- Pipes for drip irrigation
- Multi-layer pipes
- Pipes from recycled materials
- Pipes for agricultural use
- Pipes for drinking water use
- Pipes for drains
- Pipe for medical & cosmetic use

## PVC Profile Production Lines

We manufacture complete production lines for profile from hard PVC, with single screw extruder with max. production capacity of 100 kg/h.

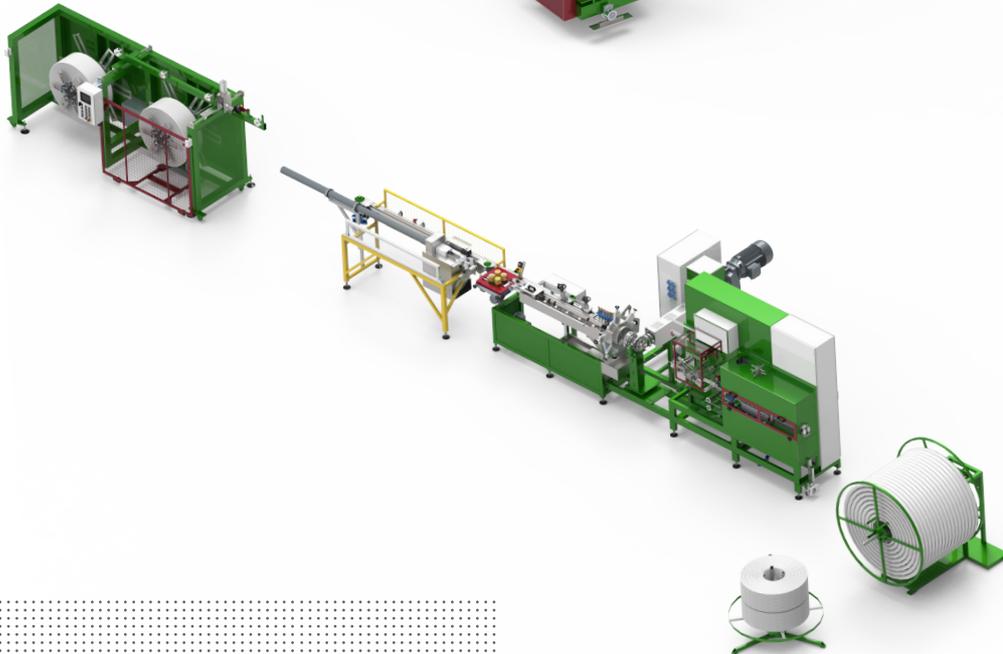

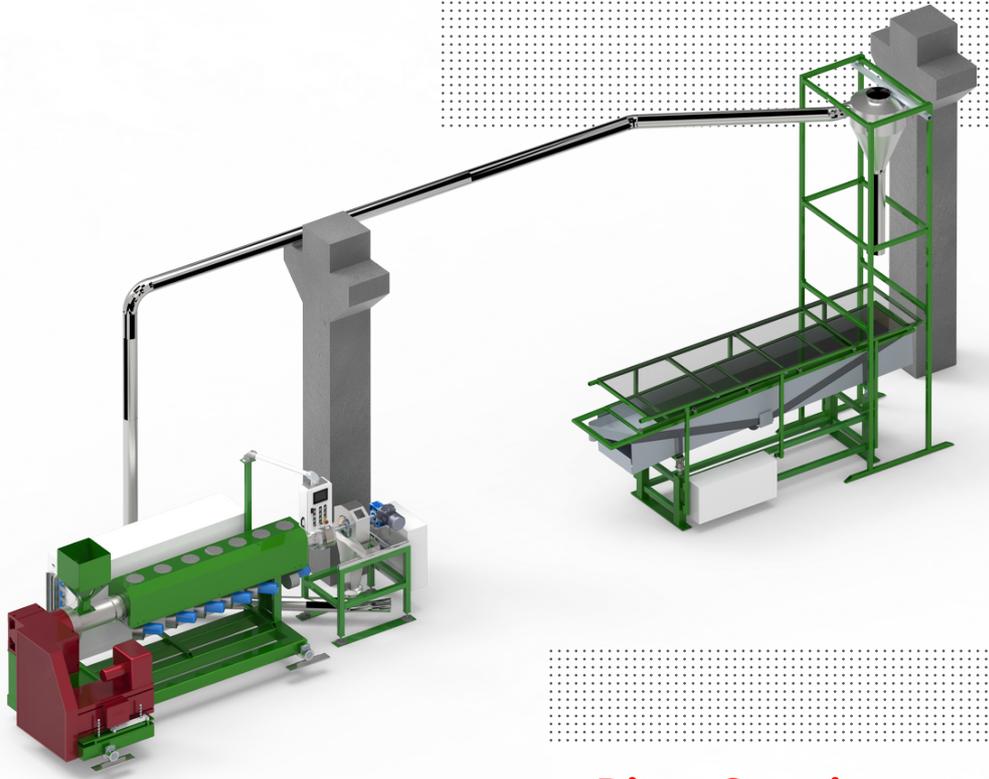

## Plastic Granulation Lines

We manufacture plastic granulation lines.

### Features:

- Air-cooled or water-cooled line.
- Production capacity up to 120 kg/h.

## Pipe Coating Lines

We manufacture complete pipe coating lines.

### Applications:

- Foam insulation coating
- Pipe coating
- Cable coating

## Special Machinery for Film

We design and manufacture **CUSTOM MADE** special machineries for film production lines:

- Un-winding systems
- Winding systems
- Haul-Offs
- Folding / Unfolding machines
- Adhesive machines
